

ABSTRACT OF THE DISCLOSURE

A foundation in the form of a water-in-oil emulsion comprising a fatty phase, an aqueous phase, at least one surfactant chosen from C₈-C₂₂ alkyl dimethicone copolyols, at least one other surfactant chosen from dimethicone copolyols, and hydrophobic coated pigments, where the fatty phase comprises at least 30% by weight, relative to the total weight of the emulsion, of a volatile fatty phase comprising:

- at least 6% by weight, relative to the total weight of the emulsion, of at least one volatile hydrocarbon oil, and

- at least one volatile oil chosen from silicone volatile oils and fluorinated volatile oils;

wherein the foundation is stable after storing at room temperature (25°C) for at least 2 months and makes it possible to obtain a homogeneous make-up on the skin.
